University of Virginia
DS 6014: Bayesian Machine Learning
Project Presentation Grading Rubric

There are 150 total possible points for your project presentation, which includes the presentation and project report.

Presentation
Your presentation will be graded on the components below, as well as style and quality. To earn all points, your slides should be easy to read and not crowded or filled with text, use graphs and visual representations wherever possible, speak clearly, and stay within the time limit. Poorly written, poorly described, or partial work will be given partial credit, and no work will be given no credit.

Components	Points Awarded
Problem description	10
Mathematical linkage between the problem and the method(s)	10
Bayesian method(s) used	10
Results and conclusions	10
Presentation style and quality	10

Project Report
Your project report will be graded on the components below. Poorly written, poorly described, or partial work will be given partial credit, and no work will be given no credit.

Components	Points Awarded
Problem description	20
Mathematical linkage between the problem and the method(s)	20
Bayesian method(s) used	20
Results and conclusions	20
Writing style	20
